

# Sehenvierecke

Ordnen Sie die gegebenen Vierecke in die Tabelle ein. Welches sind Beispiele für und welches keine Sehenvierecke?

Sehenviereck	Kein Sehenviereck

17 numbered diagrams of quadrilaterals are provided for classification. Each diagram is labeled with a number in a box:

- 1: A rectangle with vertices A, B, C, D.
- 2: A quadrilateral ABCD with a circle passing through vertices B, C, and D. The center of the circle is M.
- 3: A quadrilateral ABCD inscribed in a circle with center M.
- 4: A square with vertices A, B, C, D.
- 5: A quadrilateral ABCD with a circle passing through vertices B, C, and D. The center of the circle is M.
- 6: A quadrilateral ABCD inscribed in a circle with center M.
- 7: A trapezoid with vertices A, B, C, D.
- 8: A quadrilateral ABCD.
- 9: A trapezoid with vertices A, B, C, D.
- 10: A quadrilateral ABCD with a circle passing through vertices B, C, and D. The center of the circle is M.
- 11: A quadrilateral ABCD inscribed in a circle with center M.
- 12: A quadrilateral ABCD inscribed in a circle with center M.
- 13: A trapezoid with vertices A, B, C, D.
- 14: A quadrilateral ABCD inscribed in a circle with center M.
- 15: A quadrilateral ABCD inscribed in a circle with center M.
- 16: A quadrilateral ABCD inscribed in a circle with center M.
- 17: A quadrilateral ABCD inscribed in a circle with center M.
